Hospital Improvements Answers

I can explain how Florence Nightingale improved nursing.

Look at the picture above. Explain what the problems were at the hospital and how Florence Nightingale solved them.

Children's own responses but answers could refer to the following;

The hospital was dirty so Florence Nightingale and the other nurses mopped and cleaned it. The soldiers didn't have any clean clothes so Florence and the nurses made sure they had clean clothes and blankets. The soldiers weren't being looked after properly so Florence and some other nurses were sent to help. There weren't enough supplies at the hospital so Florence Nightingale wrote a letter to the government to ask for more medicine, bandages and blankets to be sent.

There wasn't enough food to eat so Florence Nightingale and the nurses made sure there was good, healthy food for the soldiers.
